HOW TO PLAY: KILLER SUDOKU

Sudoku meets Kakuro — cages with sum constraints.

4 puzzles · one per page · every solution printed

RULES

1. Standard Sudoku rules: each row, column, and 3x3 box has digits 1-9.
2. Dashed cages group cells — the digits must sum to the cage total.
3. No digit may repeat within a cage.
4. Easier puzzles reveal several starting digits to get you going; the hardest reveal few or none, leaving the cage sums to carry you.

16 6	24 7	8	9	23	20			28 1
	1		8			2		9
31 9		17	6		26			
				6				11
5		15	3		19 8			4
	22	24			14	3	1	21
9			25	3	9		24	
1							3	
9				8 8	6	1	9	5

Three cells are already worked out - the rest are yours.

PRO TIP

A 2-cell cage with sum 3 must be {1,2}. A 2-cell cage with sum 4 must be {1,3}. Learning small cage combinations is the key to Killer Sudoku.

COMMON MISTAKES

- Repeating a digit within a cage, even if row/column constraints allow it.
- Forgetting standard Sudoku rules still apply alongside cage sums.
