HOW TO PLAY: NUMBER BLOCKS

Fill the grid so every row and column hits its target sum.

4 puzzles · one per page · every solution printed

RULES

1. Fill each empty cell with a digit from 1 to 9 (digits may repeat).
2. Each row must add up to the target shown at its left.
3. Each column must add up to the target shown at its top.
4. Some cells are filled in to start — use them and the targets to work out the rest.

	15	19	26	22	25
23	1	1	9	7	5
24	4	5	3	5	7
19		2	7	5	
24		3	5	3	9
17	3			2	

Three cells are already worked out - the rest are yours.

PRO TIP

Start with the row or column whose target is closest to its lowest or highest possible sum — those have the fewest digit combinations, so they lock cells down fastest.

COMMON MISTAKES

- Checking only rows or only columns — every cell must satisfy BOTH its row target and its column target.
- Assuming digits can't repeat — this is a sum puzzle, not a Latin square, so a row may reuse a digit.
