HOW TO PLAY: NUMBER CROSSWORD

Every answer is a number worked out from a math clue.

4 puzzles · one per page · every solution printed

RULES

1. Each clue is a small arithmetic expression — work out its answer.
2. Write that answer's digits into its run of white cells, one digit per cell.
3. Across clues read left to right; down clues read top to bottom.
4. A small number in a cell's corner marks where a clue starts; no answer starts with 0.

One cell is already worked out - the rest are yours.

ACROSS

1. $106 - 29$ 3. $105 - 9$ 5. $90 - 11$ 7. $64 - 28$ 8. $72 + 24$

DOWN

2. $123 - 46$ 3. $102 - 9$ 4. $30 + 36$ 6. $30 + 62$

PRO TIP

Start where an across and a down clue cross — a shared cell you can pin down from one clue instantly narrows the other.

COMMON MISTAKES

- Writing a whole multi-digit answer in one cell — each cell holds a single digit.
- Filling an across answer without checking it still fits the down clues that cross it.

**Across**

- 1. $6 + 27$
- 3. $51 + 26$
- 6. $110 - 34$
- 7. $65 - 11$
- 9. $49 - 27$

Down

- 1. $26 + 11$
- 2. $16 + 21$
- 4. $13 + 63$
- 5. $74 - 49$
- 6. $70 + 5$
- 8. $48 - 6$
