HOW TO PLAY: STARLINK

Fill the grid with a single chain of consecutive numbers.

4 puzzles · one per page · every solution printed

RULES

1. Fill the blank cells so the grid holds every number from 1 up to the last.
2. Each number must touch the one before and after it — across, down, or diagonally.
3. Some numbers are given to start you off; the rest are yours to place.
4. Every cell is used exactly once — follow the chain end to end.

1	3	4	10	11	12
	5				13
			25		15
7		29	27		16
	33	36	28		17
		34	20	19	

Three cells are already worked out - the rest are yours.

PRO TIP

Find two givens that are close in value — the cells between them must form a short run, which pins their positions down fast. Remember diagonals count.

COMMON MISTAKES

- Forgetting diagonals — consecutive numbers may touch corner-to-corner, not just edge-to-edge.
- Painting yourself into a corner — always leave each number a free neighbour for the next in sequence.
