HOW TO PLAY: TAKUZU

Fill the grid with 0s and 1s following strict rules.

4 puzzles · one per page · every solution printed

RULES

1. Fill every cell with either 0 or 1.
2. Each row and column must have equal counts of 0s and 1s.
3. No more than two consecutive 0s or 1s in any direction.
4. All rows must be unique, and all columns must be unique.

0	0	1	1	0	1
0	0				1
1	1	0			
			0		1
	0	1			
				1	

Three cells are already worked out - the rest are yours.

PRO TIP

If you see two consecutive 0s, the cells on either side must be 1s (and vice versa). This simple rule cascades quickly.

COMMON MISTAKES

- Placing three consecutive 0s or 1s in a row or column.
- Forgetting the equal count rule — each row and column needs exactly $N/2$ of each digit.
